Subject: Lack of support for the Sedro-Woolley Public Library

If as much effort and enthusiasm, that has been displayed by the current Mayor and City Council , for the proposed take -over of the S-W library by the amateur staffed CSRPLCD, had been focused on improving the funding for our S-W Public Library, perhaps the public would have been better served. Non funding is not a new tool. Governments at all levels use it.

Considering the Tax Payers money already spent, and the moneys yet to be asked for, do you believe that without a vote of the citizens of Sedro-Woolley you have done what is best for the People of the City and the People that reside in the Sedro-Woolley School District ?

The fact is that many of the S-W residents, who voted for the RSRPLCD, believed that a mutual sharing of funding would lead to a stronger Public Library. They were misled.

If you have believe that the voters should have a say in how this Library issue is handled, there is only one sure way to find out. Allow a vote. We taxpayers have spent 4 years watching, listening and waiting.
