

INSTALLATION

Sign

1. A maximum of 5 street name signs or pointers shall be located on one post. Longer posts will normally be needed for more than three signs to maintain 8 feet clearance from the ground line. A 1/4 inch space should be maintained between signs on the same post.
2. Street name signs shall be located above pointers and shall be installed parallel to the street which they name. Avenue street name signs designating north-south streets should normally be on top. Wedges shall be utilized if necessary to install signs other than 90 degrees to each other.
3. Signs shall be attached perpendicular to the posts with four duplex eight-penny galvanized nails or approved sign mounting brackets.
4. Street name shall be on both sides of one sign.
5. See Drawing No. 3-51 for sign post details.
